Emiliano Spinella

Cloud Engineering Lead | Platform & Engineering Strategy |
Executive MBA
The Randstad, Netherlands

Summary

Senior technology leader with over 20 years of experience shaping engineering organizations, cloud platforms, and operating models in enterprise and regulated environments. Proven ownership of platform strategy, architectural direction, and execution across business-critical systems at scale.

Track record leading cloud and platform engineering functions spanning AWS, Azure, GCP, Kubernetes, and modern DevOps practices, with strong emphasis on governance, security, reliability, and operational maturity. Trusted to design and evolve platforms that balance innovation with risk management, compliance, and long-term sustainability.

Executive MBA combined with advanced education in Computer Engineering and Cybersecurity provides a strong foundation for executive decision-making, stakeholder alignment, and translating business objectives into coherent technology and organizational strategy.

Experience

MSIG Specialty Marine
Cloud Engineering Lead
August 2025 - Present (11 months)
Rotterdam, South Holland, Netherlands

Leading and coordinating cloud platform engineering efforts within a regulated insurance environment, with a strong specialization in Microsoft Azure and Kubernetes (AKS). The role combines hands-on technical leadership with team leadership, guiding engineers in the design, operation, and evolution of secure, enterprise-grade cloud platforms supporting critical business systems.

Key focus areas include:

- Technical & team leadership – Leading, mentoring, and coordinating Cloud Engineers, setting technical direction and best practices.
- Azure cloud platforms – Designing and operating resilient Azure architectures across networking, identity, compute, storage, and backup/DR.
- Kubernetes & platform engineering – Operating and standardizing AKS clusters, workloads, and shared platform services.
- Infrastructure as Code & automation – Driving Terraform-based provisioning, CI/CD pipelines, and operational automation.
- Security, governance & compliance – Enforcing cloud governance, access controls, and security baselines aligned with enterprise and regulatory requirements.
- Reliability & operations – Improving platform stability, observability, and operational maturity for production workloads.

Focused on building high-performing teams and delivering scalable, secure, and maintainable cloud platforms that support long-term modernization and platform strategy.

Accenture España

Cloud Engineering Lead

January 2025 - July 2025 (7 months)

Valencia, Valencian Community, Spain

Leading a team of Cloud Engineers to design, automate, and optimize large-scale cloud infrastructures. Driving multi-cloud deployments (AWS, GCP, Azure), CI/CD automation, and Infrastructure as Code (Terraform, Ansible) to improve scalability, performance, and security.

Key focus areas include:

- Cloud architecture & automation – Implementing high-availability, cost-efficient cloud solutions.
- Kubernetes & DevOps – Enhancing containerized workloads, CI/CD pipelines, and cloud security.
- FinOps & cost optimization – Reducing cloud expenses through infrastructure efficiency strategies.
- Security & observability – Strengthening IAM, mTLS, Zero Trust, and monitoring (Grafana, OpenTelemetry).

Committed to driving innovation, mentoring teams, and optimizing enterprise cloud strategies for resilient, high-performing cloud environments.

Syndeno

Co-Founder & CTO

February 2021 - January 2025 (4 years)

Valencia, Valencian Community, Spain

Built and led Syndeno, a cutting-edge CI/CD DevOps platform for Kubernetes, designed to streamline cloud-native software delivery and automation. Defined the product vision, technical strategy, and execution, leading cross-functional teams to deliver scalable, high-performance cloud solutions.

Key achievements:

- Secured €325K in EU Next Generation funding, based on my Master's thesis, "Event Streaming Open Network", pioneering event-driven cloud architectures and integrating them into Syndeno Flow for simplified AI adoption.
- Designed and launched Syndeno Platform, an integrated Kubernetes management system with CI/CD automation, available via web and CLI, improving developer productivity and streamlining cloud operations.
- Recruited and built the founding engineering team, assembling a group of highly skilled developers and DevOps professionals to execute Syndeno's platform vision.
- Led Backend & Web Development, architecting a full-stack cloud-native platform using Java SpringBoot, GoLang, TypeScript, and Angular.
- Developed Infrastructure as Code (Terraform, Kubernetes, Ansible), enabling seamless cloud-native operations across AWS, Azure, and GCP.
- Managed the full software development lifecycle (SDLC), from ideation to deployment, leveraging Agile methodologies for efficiency.
- Optimized cloud security, implementing IAM, mTLS, and Zero Trust frameworks to enhance workload identity and data protection.
- Drove Syndeno's market growth, successfully establishing it as a recognized automation and cloud-native technology provider, driving product adoption and customer satisfaction.

This role solidified my expertise in Kubernetes, DevOps, cloud-native platforms, and software engineering leadership, blending technical innovation with business strategy.

Lanzadera

Entrepreneur In Residence

July 2021 - June 2024 (3 years)

Valencia, Valencian Community, Spain

After finishing the incubation at Demium, Syndeno was accepted in Lanzadera.

Demium

Entrepreneur In Residence

February 2021 - July 2021 (6 months)

Valencia, Valencian Community, Spain

Joined Demium Incubation Program to discover the startup world. Demium specializes on building startup teams that detect problems and solve them using scalable technology. Left Demium after completing the incubation program and obtaining pre-seed investment for Syndeno.

Telefónica Tech

Global Technical Product Manager (Edge Computing Project)

June 2020 - January 2021 (8 months)

Spain

Led a fixed-term project focused on Edge Computing, evaluating and designing cloud-edge architectures to support low-latency, AI-driven workloads. Worked with AWS Outposts, Azure Edge, and Google Cloud Anthos to define high-impact use cases for 5G, IoT, and AI applications.

Key contributions:

- Developed technical strategies for edge computing adoption, optimizing latency, scalability, and security.
- Defined use cases for 5G AI applications, influencing cloud-edge product roadmaps.
- Designed and evaluated hybrid cloud-edge architectures, integrating hyperscaler solutions to enhance performance and cost-efficiency.
- Worked on strategic partnerships, aligning business and technical objectives for next-generation cloud services.

This project strengthened my expertise in Edge Computing, AI-driven cloud architectures, and hybrid cloud strategies, contributing to Telefónica Tech's next-generation cloud initiatives.

CloudBlue

Senior Global Product Manager

October 2016 - March 2019 (2 years 6 months)

Barcelona Area, Spain

Led a team of 5 Product Managers, driving global strategy and product development for Infrastructure as a Service (IaaS) and cloud automation solutions. Focused on multi-cloud orchestration, hosting services, and DevOps

automation, enabling telecom providers, MSPs, and enterprises to modernize their cloud infrastructure.

Key achievements:

- Designed and launched Ingram Micro Cloud Orchestrator (IMCO), a multi-cloud automation platform enabling seamless management of AWS, Azure, SoftLayer, VMware vCloud, and OpenStack.
- Developed and launched WebHosting Plesk, an automated web hosting solution for telecom and hosting providers, allowing scalable, shared hosting services.
- Defined and executed global cloud strategy, accelerating multi-cloud adoption and improving infrastructure scalability and cost efficiency.
- Led cross-functional collaboration between engineering, business, and cloud partners, driving enterprise cloud offerings and strategic partnerships.
- Managed and mentored a team of Product Managers, aligning product roadmaps with business goals, optimizing DevOps automation, CI/CD integration, and infrastructure management.

This role strengthened my expertise in cloud product strategy, multi-cloud orchestration, and leadership, shaping enterprise cloud transformation and product innovation at a global scale.

Level 3 Communications

Regional Product Manager

February 2011 - October 2015 (4 years 9 months)

Buenos Aires, Argentina

Led Cloud Services strategy for the Latin American market, managing product development, go-to-market execution, and multi-million-dollar revenue growth across Argentina, Brazil, Chile, Colombia, Ecuador, and Venezuela. Oversaw a cross-functional team of Software Architects, Technology Specialists, Process Specialists, and Marketing Managers, driving cloud adoption in enterprise environments.

Key achievements:

- Developed and launched Level 3's IaaS offering, defining product scope, leading new releases, and ensuring successful market adoption.
- Managed a P&L exceeding \$10M in revenue (2012–2014), driving profitability and cost optimization.
- Awarded "A Level of Excellence Award 2014" by Level 3's Global CMO for outstanding contributions to cloud services growth.

- Led enterprise cloud strategy, including Operating Systems, Databases, and SAP Managed Services, enabling large-scale cloud migrations.
- Drove strategic marketing initiatives, positioning cloud solutions at industry events and through innovative advertising campaigns.
- Acted as a pre-sales technical expert, supporting business cases exceeding \$10K MRC and securing high-value enterprise contracts.
- Trained sales teams and represented Level 3 at industry events, strengthening market influence and customer engagement.

This role reinforced my expertise in cloud product strategy, IaaS, and business leadership, contributing to Level 3's expansion in the Latin American cloud services market.

Telmex

Regional Product Manager

March 2010 - February 2011 (1 year)

Buenos Aires, Argentina

Owned the product strategy and development for SMB and Home Broadband & Telephony services across Argentina, Uruguay, and Paraguay. Defined product requirements, market positioning, and go-to-market strategies, ensuring alignment with business objectives and customer needs.

Key achievements:

- Managed the full product lifecycle for broadband and telephony services, optimizing pricing, features, and market competitiveness.
- Defined product requirements and technical specifications, working closely with Software Analysts to shape the development roadmap.
- Led market analysis and business strategy, ensuring product offerings met regional customer demand and growth objectives.
- Collaborated with cross-functional teams, aligning business, engineering, and operational teams to successfully launch and enhance telecom services.

This role strengthened my expertise in telecommunications product management, market strategy, and cross-functional collaboration, contributing to Telmex's service expansion in South America.

IPLAN

5 years

Product Manager

September 2008 - March 2010 (1 year 7 months)

Buenos Aires, Argentina

Led Data Center, Cloud Services, and E-Commerce product development for the SMB market, defining cloud strategy, product vision, and go-to-market execution. Focused on virtualization, cloud computing, and e-commerce automation, driving business growth and operational efficiency.

Key achievements:

- Defined and launched IPLAN's E-Commerce strategy, developing a Ruby on Rails (RoR) web portal integrated with third-party applications (Google Apps, etc.).
- Developed and deployed hybrid virtualization services, leveraging XEN and VMware to enhance cloud infrastructure offerings.
- Owned the full product lifecycle, from market research and requirement gathering to execution and post-launch optimization.
- Collaborated with engineering and operations teams, ensuring seamless cloud service deployments and customer adoption.

Technology Project Leader

April 2007 - September 2008 (1 year 6 months)

Buenos Aires, Argentina

Managed enterprise IT projects, overseeing cloud computing, security, and data storage infrastructure. Focused on virtualized environments and large-scale deployments to improve service resilience and operational efficiency.

Key achievements:

- Led IT infrastructure projects, including email platforms, antivirus/antispam solutions, and virtualized security (Fortinet UTM).
- Deployed and integrated third-party applications, including IronPort, NetApp, Fortinet, and CriticalPath.
- Administered a 60K-mailbox enterprise email system, running on IronPort appliances, NetApp storage, and Red Hat Enterprise Linux.
- Executed a large-scale migration of a CriticalPath email platform, improving performance and security.

Operations Engineer

April 2005 - April 2007 (2 years 1 month)

Buenos Aires, Argentina

Provided third-level Data Center operations and engineering support, specializing in Linux-based infrastructures and automation scripting to enhance cloud services and network security.

Key achievements:

- Administered 300+ Linux servers, optimizing performance, security, and reliability.
- Developed integration scripts in Perl, Python, PHP, and PL/SQL, automating network services and cloud platform operations.
- Implemented an H.323 endpoint automation system in Perl for Cisco 7400, IAD, VG248, and Audiocodes MP2000.
- Developed an Antivirus/Antispam reporting system, integrating PHP, MySQL, GD, Perl, and Python for SPAM and virus analytics.

Education

Universitat Oberta de Catalunya

Master's degree, Cybersecurity & Privacy · (September 2022 - January 2025)

EDEM Escuela de Empresarios

Executive MBA, Business Administration and Management, General · (October 2022 - September 2023)

Universitat Oberta de Catalunya

Master's degree, Computer Engineering · (February 2020 - January 2022)

Universidad Argentina de la Empresa

Bachelor's degree, Computer Engineering · (2009 - 2014)

Red Hat

RHCE · (2008 - 2008)
